PPLX

DOES YOUR BUSINESS NEED A MORE SECURE METHOD OF ACCESS CONTROL?

Card access has been out of reach for most owners of small to medium sized businesses. The cost of technology is prohibitive and up to this point has been designed for large government, commercial and industrial users.

The LiftMaster® Stand-Alone Proximity Card Reader (Model PPLX) offers high-end access control and security in a simple stand-alone format. This system allows for up to 50,000 user proximity cards or keyfobs in minutes. Also, the PPLX allows for simple deletion of lost or stolen cards without the need to re-program the entire user set. Rugged and durable, the PPLX is sealed in a weatherproof (IP67) enclosure and can be easily mounted to any flat interior/exterior surface, or installed in any single gang electrical enclosure.

For convenience, a handheld radio programming unit (Model PPRP) eliminates the need to bring a laptop computer to program the stand-alone unit.

Model PPRP

Hand-held programmer for use with LiftMaster® model PPLX, Stand Alone Proximity Access Control Device.
